

PLAZA STONE - Platinum Series

The new Platinum Series brings a new defined finish and color to concrete pavers. This series offers superior surface texture, a higher level of color presentation and enhanced product color endurance. The Platinum surface is comprised of finer gradation materials produced by state-of-the-art production equipment. This finer surface appearance differentiates itself by providing a more uniform surface appearance and color. By creating a higher density of color within the paving surface, the products color is better presented.
